

April 22, 2002

Dear Valued Customer:

Congratulations on your decision to purchase *Storage Partitions* for your SGI® Total Performance 9400 [TP9400] Fibre Channel storage system. For feature installation, please contact the SGI Service Support organization in the normal manner or refer to <http://www.sgi.com/support/supportcenters.html> to determine the local phone number to call to schedule an installation appointment.

Once the SGI System Support Engineer [SSE] has arrived at your location, please provide this letter to him or her. You will also need to provide the SSE with TP9400 5.0 CD [SC4-TP9400-5.0] in the event your hardware is running on a different version of software; for example, TP9400 3.0 or 4.0. The SSE will collect the data necessary to install the Partitioning feature and **FAX** it to the number listed below. The SSE will receive a response back via e-mail, which will include a key file to load on the TP9400. This will be used to enable the *Storage Partitions* feature. Instructions for the installation of the Feature Enable ID will be provided with the key file. Once the feature is enabled, you will see the Storage Partitioning icon [lower left of your TPSSM display screen] without the slash through the icon.

Save this information for the purchase of future features.

**For SGI SSE use only:** For more detailed information on TP9400 Premium Feature installation, please refer to Service Bulletin NPA 200520.

**Information that SGI SSE will need to collect:**

**Feature Enable Identifier:** \_\_\_\_\_  
[Follow the instructions below in your TPSSM software to obtain this 32-character ID].

**Serial number of the TP9400 module:** \_\_\_\_\_  
[Look for the labels below on the rear of the TP9400-BASE or TP9400-MAXBASE-2GB unit].

**For the serial number, find this label:**

The TP9400 module serial number is shown above.

SGI  
1600 Amphitheatre Pkwy.  
Mountain View, CA  
94043-1351  
Tel 650.960.1980

**Customer information as it appears on original purchase order to SGI:**

**Name** \_\_\_\_\_

**SGI SSE's e-mail address (for sending the activation key):** \_\_\_\_\_

**After the information has been gathered, FAX it to 316 636 8647.**

**Obtaining the Feature Enable Identifier:**

1. Start the TPSSM software and open the Array Management Window [AMW] for the TP9400 in which partitioning will be installed.
2. Open the Premium Feature tab and select the "list" function.
3. The "Feature Enable Identifier" will be displayed. You can cut and paste that identifier into a file and print it;

or

Write the identifier on the line provided above. [The identifier is a 32-character string; verify that you have written the correct string.]

**Once the Premium Feature has been installed, please review the TP9400 Product Release Notes for important information about the feature.**

Regards,

SGI TP9400 Product Team
